PRODUCT INFORMATION

## *ProBike*

Motorcycle clamping device

*Series 815*

## Product Description

The motorcycle clamping device ProBike, with related accessories, enables simple and exact centring of motorcycle wheels on a wheel balancing machine.

Depending on which type of wheel balancing machine the ProBike wing is attached, either a cylindrical or a conical insert chuck must be used for the shaft connection.

The ProBike wing can also be installed on pneumatic or electro-mechanical balancing machines.

## Product features

- Precise wheel balancing
- Optimized machine connection
- Safe and easy handling
- Can be universally used for every type of machine
- Easy and quick installation
- Longer lugs
- More powerful gas compression springs

*Application of the ProBike.*
