

TURNTABLE KIT FOR 4-WHEEL ALIGNMENT

COMPLETE TURNTABLE KIT DEVELOPED AND MANUFACTURED AT OUR WORKSHOP IN DENMARK.

The kit consists of: 2 slip plates and 2 turntables produced in materials that are protected against rust.

The turntables can be used to provide extra flexibility in a workshop, so you can carry out wheel alignment jobs - without having to purchase a complete wheel alignment lift.

The slip- and turntable plates can be attached to the lift - but can also be used loose.

FEATURES

- Including handles for easy and more ergonomic handling
- Extra galvanization for better rust protection
- The bottom of the track plates is rubber coated = increased protection of both lift and turntable
- Suitable for use on lifts without wheel alignment platforms = increased flexibility for the workshop
- Bearings in turntables are made of 100% stainless material
- The plates can be used in conjunction with a workshop/grease pit #3DKIT
